TESTIMONIALS

ELYX

"IndieMassive has been instrumental in the growth of my career. With their team's guidance I went from a fresh brand with 0 streams to 10M streams, hundreds of thousands of monthly listeners and playing mainstages at festivals! The tools they provide give you all of the information you need to make calculated decisions that have noticable impacts on your catalog. I've never been more proud to be an indie artist!"

ACTUATION MUSIC

"Unreal.. We wondered how long it would take for someone to finally build a platform like this. The industry is changing and these guys understand how to stand at the forefront of the independent community and carve a path for artists and labels to follow for success. If you name a distro platform, we've probably worked with them and **NONE** of them can compare to IndieMassive - these guys are taking over."

RICCI

"I was losing hope as an indie artist until I found IndieMassive. Since joining IndieMassive I've felt more encouraged than ever to be unique and have released some of my best music to date. This team is changing the industry!"

Fast and Helpful

Fast and Helpful

I reached out to the support team and they were really helpful and fast with their responses. In comparison to some of the previous distributors, I worked with just getting a response could take multiple days, the IndieMassive team helped resolve my issue and answered all my questions in a few hours! Definitely worth a switch!

Useful, simple & impressive

As useful as simple! I had some questions about my songs so I reached out to them, and they were able to address my concerns, all of this being kind and thoughtful. The IndieMarket is something very useful to keep in mind all the necessary aspects of the music industry, with a lot of partners that helped me to understand more about the workings of the market. It seems that everyone in the team are expert in what they're doing, which make one feel confident. I highly recommend it for any independent artist.
